Extension to Ourimbah-Wamberal environmental assessment

EnergyAustralia advises that the exhibition period for the Review of Environmental Factors (REF) on the Ourimbah-Wamberal power line project will be extended by another 18 days to Friday, January 4.

This will provide the community with further time to comment on the document, which is available at EnergyAustralia's website (www.energy.com.au) and at EnergyAustralia's offices at 14 Pioneer Avenue, Tuggerah Business Park.

EnergyAustralia's Executive General Manager – Network, Geoff Lilliss, said the decision was in response to requests from the public.

"We have been consulting the community about this project for the past two years and using their feedback to refine our proposal to get the best outcome," Mr Lilliss said.

"Extending the exhibition of the environmental assessment is another way of us making sure local residents are given every opportunity to comment."
