* The AER has not published a specific standard demand charge benchmark, which means the comparisons above don't include demand charges and are unlikely to reflect what you'll actually pay. Depending on your energy use, your actual costs may be significantly higher than the figures shown.

^ The AER has not published a specific benchmark for businesses with controlled load, so the comparisons exclude controlled load rates and are unlikely to reflect what you'll actually pay. Depending on your controlled load usage, your actual costs may be significantly higher than the comparison figures shown above.
