

1. Introduction and Aggregation

- (a) This Contract sets out the terms on which EnergyAustralia will sell electricity to the Customer at the Connection Points, and the arrangements for providing and installing a Meter.
- (b) The Customer expressly acknowledges and agrees that if this Contract applies to more than one Premises, the Customer is an Aggregated Customer and as such:
 - (i) the consumption of electricity at all Premises (including those that are added after this Contract is executed, but excluding those in Victoria) will be treated as aggregated for the purposes of Division 3 of Part 1 of the *National Energy Retail Rules*, Part 2 of the *National Energy Retail Rules* and Part 2 of the *National Energy Retail Law*;
 - (ii) because of clause 1(b)(i) above, the Customer will not receive the additional regulatory protections that apply to Small Customers under the relevant provisions of the *National Energy Retail Rules* and the *National Energy Retail Law* (as applicable); and
 - (iii) should the Customer require any meters to be installed, the Meter Installation Timeframes set out in the *National Electricity Rules* do not apply.

2. Sale and Purchase of Electricity

- (a) EnergyAustralia agrees to sell to the Customer, and the Customer agrees to purchase from EnergyAustralia, electricity supplied to the Connection Points, in accordance with the terms of this Contract.
- (b) In order to sell electricity to the Customer at a Connection Point, EnergyAustralia will:
 - (i) become Financially Responsible for the Connection Point;
 - (ii) pay any Market Charges to the Market Operator;
 - (iii) arrange and pay for Network Services for the Connection Point (unless the Customer makes its own arrangements); and
 - (iv) arrange and pay for Connection Services and Metering Services for the Connection Point (unless the Customer makes its own arrangements).
- (c) EnergyAustralia will not connect the Customer's Premises to the Network or supply, deliver or convey electricity to a Connection Point. EnergyAustralia will arrange for the relevant Network Operator to provide these Connection Services and Network Services.
- (d) Network Services may be subject to fluctuations or distortions (in voltage magnitude, voltage waveform or frequency) or interruptions. EnergyAustralia cannot (in its arrangements with Network Operators or otherwise) control the continuity of Network Services or the quality characteristics of electricity supply.
- (e) If the Customer requires increased security of electricity supply, it should discuss the possible options with EnergyAustralia as soon as practicable.

3. Term

This Contract commences on the Commencement Date and, subject to clause 11.2, expires on the Expiry Date.

4. Commencement of Sales

- (a) If EnergyAustralia is already Financially Responsible for a Connection Point on the Commencement Date, the terms of this Contract will apply to the sale of electricity at that Connection Point on and from the Start Date.
- (b) If EnergyAustralia is not already Financially Responsible for a Connection Point on the Commencement Date, EnergyAustralia will sell electricity to the Customer at a Connection Point once the Transfer Requirements have been met and it becomes Financially Responsible for that Connection Point.
- (c) EnergyAustralia will use its best endeavours to meet the Transfer Requirements for each Connection Point once EnergyAustralia has been provided with any security specified in the Schedule and it is satisfied that:
 - (i) the Customer owns or is entitled to occupy the relevant Premises;
 - (ii) the Customer is not a Small Electricity Customer;
 - (iii) the Customer has a current Connection Contract;
 - (iv) a Metering Coordinator has been appointed, and the Metering Coordinator has made appropriate arrangements to ensure Metering Services are provided at the Connection Points for the supply of electricity by EnergyAustralia; and
 - (v) the Customer has a satisfactory credit assessment on the Start Date and if not, the Customer has provided security as requested by EnergyAustralia under clause 7.1(c) before the Start Date.
- (d) The Customer's Metering Services will be provided by the Metering Coordinator for the Connection Points. EnergyAustralia will appoint the Metering Coordinator, unless the Customer appoints its own Metering Coordinator in accordance with the Rules.
- (e) EnergyAustralia is under no obligation to sell electricity under this Contract if by the Start Date the Customer fails to satisfy any of the conditions under clause 4(c).

4A. Continued Eligibility for this Contract

- (a) At any time after the Commencement Date, if EnergyAustralia reasonably considers that the Customer's consumption of electricity at the Premises (or Premises if aggregated under clause 1(b)) for the next 12 month period is likely to be less than the Small Customer Thresholds for the Jurisdiction, it may reclassify the Customer as a Small Electricity Customer.
- (b) For the purposes of clause 4A(a), EnergyAustralia will take account of any consumption data in respect of the Customer for the previous 12 month period it has available to it.
- (c) If EnergyAustralia reclassifies a Customer as a Small Electricity Customer under clause 4A(a), it may, by giving prior reasonable notice in accordance with any applicable timeframes required by the laws of the relevant Jurisdiction:

- (i) amend the Charges set out in the Schedule; and/or
 - (ii) replace the terms and conditions in this Contract with the terms and conditions contained in EnergyAustralia's Market Retail Contract.
- (d) The Customer expressly acknowledges and agrees that:
- (i) the applicable Charges may increase; and
 - (ii) the variation of this Contract allowed under clause 4A(c) is reasonably necessary to enable EnergyAustralia to comply with its obligations towards Small Electricity Customers under the laws of the Jurisdiction.
- (e) If EnergyAustralia amends this Contract under clause 4A(c), it will send the Customer a welcome pack setting out the new Charges and terms and conditions applicable to the Customer. The Customer will have a 10 Business Day "Cooling-Off Period" after receipt of the welcome pack to end this Contract.

5. Charges

5.1 Charges Generally

- (a) The Customer must pay the Charges for each Connection Point. The Charges may comprise fixed amounts, amounts calculated as a daily or other periodic rate, amounts calculated as a rate for the electricity consumed or demand recorded at the relevant Connection Point, or any combination of the above.
- (b) Some Charges may be based on:
 - (i) EnergyAustralia's reasonable estimation of its relevant costs (where those costs are not known in advance); and/or
 - (ii) EnergyAustralia's reasonable allocation of those costs across its customers (where those costs are incurred in respect of multiple customers or connection points); and/or
 - (iii) EnergyAustralia's reasonable estimation of any applicable Metering Charges when the Customer requires a Meter upgrade, installation of a new Meter or a Meter transfer after the Start Date.
- (c) EnergyAustralia will regularly review the basis of any estimates and allocations used in determining such Charges, revise the rates of such Charges and endeavour to only recover EnergyAustralia's actual costs. However, EnergyAustralia will not revise Charges retrospectively (other than in connection with a change in EnergyAustralia's REE Costs) or compensate the Customer for any over-estimation during a period.
- (d) Pursuant to clause 19, EnergyAustralia may, at its discretion, charge the Customer for any copy bills, meter data reports and other ad hoc requests from the Customer that are not covered under this Contract at EnergyAustralia's reasonable estimation of the relevant costs that may vary from time to time.

5.2 Varying Charges

- (a) Subject to paragraph (b) of this clause, the Energy Charges and Environmental Charges (if any) applying to a Connection Point at the Commencement Date are set out in the Schedule.
- (b) EnergyAustralia may adjust the Energy Charges (including the rate of any Energy Charges) or introduce a new Charge (including a Carbon Scheme Charge) at any time prior to the Expiry Date if:
 - (i) there is a Change in Law, by an amount necessary to recover all of EnergyAustralia's costs arising as a direct or indirect result of

the Change in Law, including if such Change in Law occurs or takes effect between the Commencement Date and the Start Date;

- (ii) the Customer requires a Meter upgrade, or the Customer has a new Meter installed after the Start Date and the Customer is required to be billed, on an actual or estimated basis as determined by EnergyAustralia;
 - (iii) the Customer fails the credit assessment conducted by EnergyAustralia, and/or the Customer fails to provide security or parent company guarantee as determined by EnergyAustralia; or
 - (iv) there is a material difference between the Customer's Forecast Load Shape and Actual Load Shape, and such adjustment or new Charge may reflect an amount necessary to recover all of EnergyAustralia's Additional Load Costs.
- (c) Subject to any capped or fixed Environmental Charges set out in the Schedule, EnergyAustralia may adjust the Environmental Charges (including the rate of any Environmental Charges) at any time prior to the Expiry Date by an amount necessary to recover all of EnergyAustralia's Environmental Costs arising as a direct or indirect result of selling electricity to the Customer at the Connection Points.
- (d) Where:
- (i) any component of the Environmental Charges is based on EnergyAustralia's forecast of any of its Environmental Costs; and
 - (ii) EnergyAustralia's relevant actual Environmental Costs materially differ from the amount forecast,
- then EnergyAustralia must factor that difference into EnergyAustralia's forecast of any of the relevant Environmental Costs for the next forecast period.
- (e) The Customer acknowledges that all other Charges generally represent costs incurred by EnergyAustralia from third parties in order to sell electricity to the Customer at the Connection Points. These costs, and the Charges required to recover those costs, may change from time to time. EnergyAustralia will pass through all such charges to the Customer without applying any mark up or margin (other than to recover reasonable administrative costs) where it is reasonably practical to do so.
- (f) On the Start Date, the Customer must advise EnergyAustralia if:
- (i) any Premises are listed in the Register of Scheduled Activity Premises maintained by the Essential Services Commission under the *Victorian Energy Efficiency Target Regulations 2008* (Vic);
 - (ii) any Premises are listed in the current Ministerial Order issued under the *Electricity Supply Act 1995* (NSW), as gazetted from time to time; or
 - (iii) the Customer holds an exemption certificate issued by the Clean Energy Regulator under section 22E(2) of the *Renewable Energy (Electricity) Regulation 2001* (Cth),
- and the Customer must promptly notify EnergyAustralia if it or a Premises comes to have, or ceases to have, any such status during the Term of this Contract.
- (g) The Customer must give EnergyAustralia as much notice as is reasonably practicable if:

- (i) it proposes to install any equipment (including solar panels, wind turbines or batteries) at the Premises; or
- (ii) it proposes to alter its operations including by participating or ceasing to participate in any demand response activity or otherwise agreeing to increase or reduce its electricity consumption in response to requests from the Market Operator or a Market Participant,

that may cause the Customer's Actual Load Shape to differ from its Forecast Load Shape. Such notice must be in writing and must provide details of the type and size of equipment proposed to be installed at the premises or the proposed change in operations (as the case may be), and the Customer's reasonable estimate of how this might affect the Customer's Actual Load Shape.

5.3 Goods and Services Tax

- (a) Unless expressly stated otherwise, all amounts under this Contract are stated as GST exclusive amounts.
- (b) If any GST is or becomes payable in respect of a Taxable Supply of goods or services under this Contract, the Charges payable by the Customer for that Taxable Supply of goods or services will be increased by an amount equal to the GST payable.
- (c) EnergyAustralia must provide the Customer with a Tax Invoice in respect of any Taxable Supply under this Contract.

6. Invoices and Payment

6.1 Invoices

- (a) EnergyAustralia will prepare and forward invoices to the Customer's nominated address set out in the Schedule monthly on a calendar month basis. An invoice may be in respect of one or more Connection Points.
- (b) The due date for payment of an invoice will be set by reference to the payment terms set out in the Schedule.

6.2 Contents of Invoices

Each invoice prepared by EnergyAustralia must include:

- (a) the period for which the invoice applies;
- (b) the Charges payable for each Connection Point for the period;
- (c) sufficient information to enable the Customer to verify the Charges;
- (d) a statement that it is a Tax Invoice and the amount of GST payable;
- (e) the due date for payment; and
- (f) payment methods.

6.3 Payment Terms

- (a) The Customer must pay EnergyAustralia the Charges set out in an invoice by the due date for payment.
- (b) A payment due on a day that is not a Business Day shall be paid on the next Business Day.
- (c) The Customer will only be considered to have made a payment once EnergyAustralia, or an agent authorised to accept payments on behalf of EnergyAustralia, receives the payment in cleared funds.
- (d) EnergyAustralia may charge the Customer any credit card fees it incurs in connection with the payment of an invoice paid by credit card.
- (e) EnergyAustralia may nominate a required payment method or change payment methods from time to time under this Contract.

6.4 Invoice Disputes and Errors

- (a) If the Customer disputes the amount of an invoice, the Customer must:

- (i) provide EnergyAustralia with written notice of the amount in dispute and the reasons for the dispute as soon as possible; and
- (ii) if the dispute is not resolved before the due date for payment of the relevant invoice, pay EnergyAustralia (by the due date for payment) the greater of the undisputed amount of the invoice and the average of the Customer's last three invoices for the relevant Connection Points.

- (b) If EnergyAustralia believes there is an error in an invoice, or receives information relevant to an invoice after sending it to the Customer, EnergyAustralia shall adjust the invoice from the time when the error occurred (whether paid or not) and send a replacement or adjustment invoice to the Customer.

6.5 Interest

- (a) If the Customer does not pay an invoice in full (or any lesser amount permitted by clause 6.4(a)) by the due date for payment, then in addition to any other right it may have under this Contract, EnergyAustralia may require the Customer to pay interest on the unpaid amount and compensate EnergyAustralia for any costs incurred in recovering the unpaid amount.
- (b) Interest on outstanding amounts will accrue on a daily basis from the due date for payment until the date EnergyAustralia receives payment in full.
- (c) Interest will be calculated at the rate prescribed (at the relevant date) under section 2 of the *Penalty Interest Rates Act 1983 (Vic)* for paying interest on a judgment debt, plus 5%.

7. Security

7.1 Provision and Use of Security

- (a) EnergyAustralia may, at any time of this Contract, conduct a credit assessment of the Customer.
- (b) The Customer must provide EnergyAustralia with the security (if any) set out in the Schedule. Such security may include a parent company guarantee.
- (c) EnergyAustralia may also require security, or additional security, from time to time if:
 - (i) the Customer fails to pay two consecutive invoices for a Connection Point by the due date for payment;
 - (ii) the Customer fails to pay three invoices for a Connection Point by the due date for payment within any 12 month period;
 - (iii) EnergyAustralia considers that the Customer, having a satisfactory credit assessment on the Commencement Date, ceases to have a satisfactory credit assessment prior to the Start Date or at any time during the term of this Contract; or
 - (iv) any provider of credit support for the Customer ceases to have an Approved Rating.
- (d) EnergyAustralia may access any security at any time in order to satisfy (or partially satisfy) any outstanding obligation of the Customer under this Contract.
- (e) If EnergyAustralia accesses any security, it may require the Customer to provide any top-up security necessary to restore the security to the required amount.
- (f) If any security, additional or top-up security is required, EnergyAustralia must provide the Customer with at least 10 Business Days' notice of the amount required and the date by which it must be provided.
- (g) Any security provided must be in a form acceptable to EnergyAustralia. No interest will be payable by EnergyAustralia on any cash security it holds.

- (h) Any costs incurred in providing the security shall be borne by the Customer.
- (i) The Customer must provide EnergyAustralia with all assistance and information reasonably requested by EnergyAustralia in conducting a credit assessment for the duration of the Contract.

7.2 Return of Security

- (a) EnergyAustralia must refund or return any security to the Customer within a reasonable period following termination of this Contract, but only if another electricity retailer has become Financially Responsible for the Connection Points and the Customer has paid EnergyAustralia all amounts owing under this Contract.
- (b) EnergyAustralia will not be required to refund or return any security on a transfer or assignment by the Customer of this Contract, unless and until the relevant transferee or assignee has provided EnergyAustralia with an acceptable replacement security.

8. Metering

8.1 Metering Coordinator

- (a) Under the Rules, a Metering Coordinator must be appointed for the Connection Points. The Metering Coordinator is responsible for arranging and providing Metering Services, and appointing a Metering Provider and Metering Data Provider.
- (b) EnergyAustralia is responsible for appointing the Metering Coordinator for the Connection Points unless the Customer chooses to appoint its own Metering Coordinator (and is allowed to do so under the Rules). If the Customer chooses to appoint its own Metering Coordinator at any time prior to this Contract being terminated in accordance with Clause 11 (including before the Commencement Date) the Customer must:
 - (i) inform EnergyAustralia in writing as soon as is reasonably practicable but in all circumstances within 10 Business Days of the commissioning of a new or replacement Meter by the Customer's appointed Metering Coordinator; and
 - (ii) provide EnergyAustralia with any documentation it requests and which is required to confirm the Charges applicable under the arrangements with the Customer's appointed Metering Coordinator.
- (c) Unless and until the Customer complies with the obligations in clause 8.1(b), EnergyAustralia will not be required to amend the Metering Charges applicable under this Contract, and any amendments to those Charges applicable to any previous billing periods will be in EnergyAustralia's absolute discretion.

8.2 Meter Accuracy and Testing

- (a) Each party must notify the other party as soon as possible if it suspects that a Meter at a Connection Point is or may be defective, damaged or operating inaccurately (i.e. not operating within the specifications set out in the Metering Rules).
- (b) EnergyAustralia may request the Metering Coordinator (including a Metering Coordinator appointed by the Customer) to make arrangements for the testing of a metering installation in its absolute discretion, or at the request of the Customer.
- (c) If EnergyAustralia, at the request of the Customer, requests the Metering Coordinator to arrange to test the metering installation, the Customer is responsible for meeting any costs of testing incurred by EnergyAustralia.
- (d) The person who appointed the Metering Coordinator must arrange for the Metering Coordinator to replace or repair a Meter that is not

operating within the specifications set out in the Metering Rules.

- (e) EnergyAustralia must make an appropriate adjustment in the Customer's next invoice if testing reveals that a Meter is not operating within the specifications set out in the Metering Rules. However, EnergyAustralia is not required to adjust the Customer's invoices to the extent that the Customer or any third party (other than a Metering Coordinator appointed by EnergyAustralia) caused the relevant inaccuracy and the adjustment would cause EnergyAustralia loss (after EnergyAustralia has used all reasonable endeavours to mitigate its loss).

8.3 Estimations

- (a) Where circumstances prevent an accurate Meter reading, EnergyAustralia may estimate, or ask the Metering Coordinator to estimate, electricity consumption and demand at a Connection Point.
- (b) Where possible, EnergyAustralia must reconcile Charges based on an estimation of electricity consumption with electricity consumption recorded by the next available Meter reading. An appropriate adjustment must be made in the Customer's next invoice.

8.4 Customer Obligations Regarding Meters

The Customer must:

- (a) provide a suitable and safe location for installing a Meter at each Connection Point;
- (b) provide safe and unhindered access to each Meter at all reasonable times to any employee, agent, contractor or other authorised personnel of EnergyAustralia or any Metering Coordinator, Metering Provider or Metering Data Provider;
- (c) ensure the proper care and custody of each Meter, not damage or interfere in any way with a Meter or permit any electricity consumption at a Connection Point that is not recorded by a Meter;
- (d) where a Meter is not owned by the Customer, not mortgage, charge or otherwise deal inconsistently with the rights of the owner of that Meter; and
- (e) notify EnergyAustralia in advance if the Connection Point shall be modified due to the installation of a solar photovoltaic generator.

8.5 Changing Meters

If, during the term of this Contract:

- (a) the Customer's electricity consumption or demand changes materially;
- (b) the basis for calculating Network Charges is varied;
- (c) the requirements of the Metering Rules are amended,
- (d) the Customer installs a solar photovoltaic generator and, as a result, needs to modify the Connection Point, or
- (e) the Customer requires a Meter upgrade

EnergyAustralia may request the Metering Coordinator to arrange installation of a further or replacement Meter at a Connection Point. The Customer must meet EnergyAustralia's costs incurred in relation to that installation or replacement Meter and pay any adjusted Metering Charges.

8.6 Unmetered Supply

Nothing in clauses 8.1 to 8.5 will apply to any Connection Point with a type 7 metering installation. The parties acknowledge that Local Network Service Provider is appointed as the Metering Coordinator and will calculate the electricity consumption at such Connection Point in accordance with the Rules.

9. Reliability Instrument

If the AER makes a Reliability Instrument during the Term of this Contract or during any Run Off Period, then EnergyAustralia may charge the Customer for, and the Customer must pay, any costs EnergyAustralia incurs in connection with the RRO (including but not limited to the costs associated with procuring Qualifying Contracts) in respect of the Customer's Connection Points under this Contract.

10. Disconnection and Reconnection

10.1 Grounds for Disconnection

EnergyAustralia may request the relevant Network Operator or Metering Coordinator to disconnect a Connection Point:

- (a) if the Customer has failed to pay any Charges by the due date for payment (including interest for late payments) and EnergyAustralia has provided at least 10 Business Days' notice of that default to the Customer;
- (b) if the Customer has breached any other provision of this Contract and has not remedied that breach within any reasonable period notified by EnergyAustralia;
- (c) if the Customer fails to provide the security in accordance with clause 7;
- (d) if EnergyAustralia reasonably believes that the Customer no longer has a current Connection Contract;
- (e) to protect the Network and in the interests of other customers;
- (f) in the circumstances of Force Majeure Event; or
- (g) pursuant to any right or obligation at law.

10.2 Disconnection and Termination

Disconnection of a Connection Point, for any reason, does not constitute termination of this Contract in respect of that Connection Point, nor will it prevent EnergyAustralia from exercising any other rights it may have under this Contract.

10.3 Vacation of the Premises

- (a) The Customer must notify EnergyAustralia in writing about its intention to vacate the Premises. Such notification shall be provided to EnergyAustralia at least 30 days before Customer's proposed date of disconnection or vacation of the Premises.
- (b) The Customer must ensure that the Premises are safe and secure and provide unrestricted access to the Meter at each Connection Point during business hours.
- (c) The Customer is liable for all Charges up to the date of disconnection, or where applicable, the date that the new occupant enters into a new retail electricity agreement. The Early Termination Charges may also apply pursuant to clause 11.6.
- (d) EnergyAustralia shall apply best endeavours to finalise the disconnection within the required timeframe, however the Customer remains liable for the ongoing Charges until the disconnection occurs.
- (e) The Customer may authorise EnergyAustralia to release details of the Charges of this Contract to the new occupant of the Premises.

10.4 Charges

EnergyAustralia may charge the Customer for any cost it incurs in arranging disconnection of a Connection Point (even if the relevant Premises are not actually disconnected from the relevant Network).

10.5 Reconnection

EnergyAustralia may arrange for reconnection of a Connection Point once it is satisfied that the grounds for disconnection no longer apply. The Customer must pay

any costs incurred by EnergyAustralia in arranging reconnection.

10A Planned Interruptions

10A.1 EnergyAustralia's Planned Interruptions

- (a) EnergyAustralia may arrange retailer planned interruptions to the supply of electricity to the Customer's Premises where permitted under the energy laws for the purpose of the installation, maintenance, repair or replacement of the electricity Meter.
- (b) If Customer's electricity supply will be affected by a retailer planned interruption arranged by EnergyAustralia, EnergyAustralia will give Customer at least 4 Business Days' notice.

10A.2 Information about Planned Interruptions

- (a) If the Customer requests EnergyAustralia to do so, EnergyAustralia will use best endeavours to explain a retailer planned interruption to the supply of electricity to the Premises which was arranged by EnergyAustralia.
- (b) If the Customer requests an explanation be in writing EnergyAustralia must, within 10 Business Days of receiving the request, give the Customer either:
 - (i) the written explanation; or
 - (ii) an estimate of the time it will take to provide a more detailed explanation if a longer period is reasonably needed.
- (c) For interruptions made by Customer's Network Operator, EnergyAustralia may refer the Customer to the Network Operator to provide information.

11. Termination

11.1 Rights of Termination

This Contract can be terminated by:

- (a) the Customer entering into an arrangement for another electricity retailer to become Financially Responsible for a Connection Point;
- (b) notice from EnergyAustralia to the Customer if:
 - (i) a Connection Point is disconnected or EnergyAustralia has grounds for disconnection of a Connection Point under clause 10.1;
 - (ii) the Customer becomes insolvent, deregistered or breaches any material provision of this Contract and has not remedied that breach within any reasonable period notified by EnergyAustralia; or
 - (iii) EnergyAustralia (acting reasonably) believes the Customer has provided EnergyAustralia with false or misleading information concerning a material aspect of this Contract, including information regarding the ownership or occupation of the Premises, the Customer's electricity consumption or the Customer's credit position; or
 - (iv) the Customer fails credit assessment conducted by EnergyAustralia and/or does not provide security or parent company guarantee; or
 - (v) if the Customer elected to appoint a Metering Coordinator—the Customer does not ensure a Metering Coordinator is appointed for the Connection Point at all times;
- (c) notice from the Customer to EnergyAustralia if EnergyAustralia becomes insolvent, deregistered or breaches any material provision of this Contract and has not remedied that breach within any reasonable period notified by the Customer.

All notices under this clause 11.1 shall be provided in accordance with clause 18.2.

11.2 Run Off Period

- (a) Notwithstanding the termination or expiry of this Contract, EnergyAustralia will continue to sell the Customer electricity consumed at the Connection Points on the terms of this Contract until another electricity retailer becomes Financially Responsible for the relevant Connection Points (the Run Off Period). The Customer must pay EnergyAustralia any Charges and otherwise continue to comply with the terms of this Contract during any Run Off Period.
- (b) During any Run Off Period, Energy Charges and Environmental Charges will be calculated at a Default Rate.

11.3 Post Expiry New Contract Offer

- (a) This clause will only apply if the Customer:
 - (i) has, at the Commencement Date, a Forecast Load of less than 500MWh in any contract year; or
 - (ii) at any stage after the Commencement Date, in EnergyAustralia's reasonable opinion, the Customer's aggregate consumption of electricity at the Connection Points in any Contract Year will be less than 500MWh.
- (b) EnergyAustralia may, by providing the Customer with notice at least 30 days (and not more than 60 days) prior to the Expiry Date, propose a replacement retail electricity contract (New Contract) for some or all of the Connection Points following the Expiry Date (an Offer).
- (c) An Offer must include the terms and conditions of the New Contract, the term of the New Contract, the Connection Points to which the New Contract will apply and the charges applicable to those Connection Points.
- (d) The Customer will be deemed to have accepted an Offer made in accordance with this clause if it has not rejected the Offer by written notice to EnergyAustralia within 14 days after receiving this Offer. A New Contract will be deemed to commence on the Start Date set out in the Offer (which may not be earlier than the Expiry Date).
- (e) If the Customer:
 - (i) rejects the Offer; and
 - (ii) does not accept a New Contract or another contract with EnergyAustralia; and
 - (iii) does not transfer the Connection Points to another electricity retailer in accordance with the Transfer Requirementsthe Customer will, after the Expiry Date, pay the Default Rate pursuant to clause 11.2.

11.4 Retailer of Last Resort Event

If a Last Resort Event occurs in respect of a Connection Point:

- (a) EnergyAustralia must provide the Customer's name, billing address and national metering identifier for the relevant Connection Point to the applicable Retailer of Last Resort within the timeframe required by the laws of the relevant Jurisdiction; and
- (b) this Contract will automatically terminate in respect of such Connection Point.

11.5 Preservation of Rights

On the expiry or termination of this Contract, each party will retain any rights it may have against the other for any past breach of the Contract or in respect of any amounts payable to it under this Contract.

11.6 Early Termination Charges

- (a) Unless the Customer and EnergyAustralia agree otherwise in writing, if this Contract is terminated pursuant to clauses 11.1(a) or (b), the Customer

shall pay to EnergyAustralia Early Termination Charges.

- (b) Early Termination Charges shall be applied to the Contract term pursuant to clause 11.3.

12. Multiple Connection Points

12.1 Adding Connection Points

If the parties agree to add further Connection Points to this Contract, EnergyAustralia must amend the Schedule to incorporate those new Connection Points and the agreed Charges and other provisions applying to those Connection Points.

12.2 Removing Connection Points

If the parties agree to remove Connection Points from this Contract, or this Contract is terminated in respect of some Connection Points only, EnergyAustralia must amend the Schedule to remove those Connection Points and the Charges and other provisions applying only to those Connection Points.

12.3 Disconnection and Termination

Where this Contract applies to multiple Connection Points, clauses 10 and 11 apply to each of those Connection Points severally. One or more Connection Points may be disconnected under clause 10, and this Contract may be terminated in respect of one or more Connection Points under clause 11, without affecting the continued application of this Contract to any other Connection Points.

13. Force Majeure

- (a) If a Force Majeure Event occurs and prevents a party (the Affected Party) from performing any of its obligations under this Contract, the Affected Party must notify the other party as soon as possible of the nature of the Force Majeure Event, the time of its commencement and likely duration and the extent to which the Affected Party is prevented from performing its obligations under this Contract.
- (b) An Affected Party's obligations under this Contract are suspended to the extent that the Affected Party is prevented from performing them by a Force Majeure Event. However, a Force Majeure Event will not suspend any obligation of an Affected Party to make any payment to the other party in accordance with this Contract and Schedule.
- (c) An Affected Party must endeavour to overcome the effects of a Force Majeure Event, but nothing in this clause will require the Affected Party to settle any industrial dispute.
- (d) Performance of an Affected Party's obligations must recommence once the relevant Force Majeure Event has been rectified or ceases to exist.

14. Limitation of EnergyAustralia's Liability

- (a) EnergyAustralia has no Liability for any loss or damage the Customer suffers arising as a consequence of, or in connection with:
 - (i) the control or use of electricity at the Premises;
 - (ii) the disconnection of any Premises;
 - (iii) any fluctuation or distortion (in voltage magnitude, voltage waveform or frequency) or interruption in Network Services; or
 - (iv) Network Services, Connection Services or the acts or omissions of a Network Operator or any third party; or
 - (v) Metering Services or the acts or omissions of a Metering Coordinator (unless the Metering Coordinator is EnergyAustralia).

unless and to the extent that the Customer's loss or damage is directly caused by a breach of this Contract by EnergyAustralia or by the wilful or negligent act or omission of EnergyAustralia.

- (b) EnergyAustralia has no Liability to the Customer for:
 - (i) any indirect or consequential losses or damages of any kind; or
 - (ii) any Economic Loss.
- (c) To the extent that EnergyAustralia has any Liability to the Customer, EnergyAustralia's Liability is limited, for all claims the Customer makes in any one calendar year in aggregate, to \$10,000.
- (d) The Customer indemnifies EnergyAustralia against:
 - (i) any liability incurred or damage suffered by EnergyAustralia or any other person claiming against EnergyAustralia, directly or indirectly resulting from or arising out of or in connection with the sale of electricity to the Customer under this Contract other than as a result of the breach of this Contract, negligence or wilful misconduct by EnergyAustralia; and
 - (ii) any losses, fines, penalties, charges, costs, fees or other amounts that EnergyAustralia may be required to pay or otherwise becomes liable or responsible for, due to the Customer not complying with any of its obligations under this Contract.
- (e) If any condition or warranty is implied into this Contract under the *Competition and Consumer Act 2010 (Cth)*, then EnergyAustralia's Liability (if any) for breach of that condition or warranty in connection with any goods or services supplied or to be supplied by EnergyAustralia under this Contract (that are not of a kind ordinarily acquired for personal, domestic or household consumption), is limited, as far as the law permits and at EnergyAustralia's option, to resupplying the goods or services or paying for their resupply.
- (f) Nothing in this Contract is to be taken to exclude, restrict or modify any condition or warranty that EnergyAustralia is prohibited by law from excluding, restricting or modifying. All other conditions and warranties, whether or not implied by law, are excluded.

15. Dispute Resolution

15.1 Notice of Dispute

- (a) A party claiming that a dispute has arisen must serve written notice of the dispute to the other party's representative. The written notice must specify that it is a notice given under this Contract and give full particulars of the nature and extent of the dispute.
- (b) If a dispute cannot be settled by negotiation within 20 Business Days after commencing negotiation, then either party shall give written notice to the senior management of the other party declaring that a dispute exists. The notice must set out the details of the dispute and the steps taken to resolve the dispute.
- (c) The senior management, or their nominees, shall meet within 10 Business Days of the dispute being declared and shall use their reasonable endeavours to resolve the dispute.
- (d) Neither party shall commence legal proceedings concerning a matter in dispute (other than for the purpose of seeking urgent injunction or declaratory relief) unless the parties have attempted to resolve the dispute in accordance with clauses 15.1(a), (b) and (c).

15.2 Continuing Obligations

Notwithstanding the existence of a dispute, each party must continue to perform its obligations under this Contract.

15.3 Costs

The parties must bear their own costs in relation to any disputes under this Contract.

16. Use of Information

16.1 Confidentiality

The Customer and EnergyAustralia shall not disclose any Confidential Information to any third party until 3 years following the expiry or termination of this Contract.

16.2 Permitted Disclosures

- (a) Nothing in this clause will prevent the Customer and EnergyAustralia disclosing Confidential Information in circumstances where disclosure is:
 - (i) required by law or under the Rules;
 - (ii) required for the parties to carry out their obligations or exercise their rights under this Contract;
 - (iii) to the party's officers, employees, agents, contractors and related bodies corporate (limited to the extent those persons are required to have access to such Confidential Information);
 - (iv) to potential buyers of the Customer's business or potential assignees of this Contract;
 - (v) required by a recognised stock exchange of which either party is a member;
 - (vi) to the parties legal or other professional advisers (including a broker) appointed to procure an electricity supply on behalf of the Customer;
 - (vii) new occupant of the Premises if authorised by the Customer; or
 - (viii) with the prior written consent of either party.
- (b) The Customer and EnergyAustralia will be responsible for the actions of its officers, employees, agents, contractors and advisers and must ensure that those persons comply with the obligations under this clause.
- (c) The Customer and EnergyAustralia must immediately notify the other party of any actual or potential breach of confidentiality, disclosure or unauthorised use of the Confidential Information, and take all steps to prevent or stop such breach.

16.3 Personal Information

- (a) EnergyAustralia may collect and disclose personal information (as defined in the *Privacy Act 1988 (Cth)*) about the Customer in accordance with its Privacy Policy, available at www.energyaustralia.com.au, and in accordance with the Privacy Statement attached at Appendix A.
- (b) EnergyAustralia may also disclose personal information about the Customer where disclosure is:
 - (i) required to verify the creditworthiness of the Customer or for the purposes of recovering any amounts owed by the Customer under this Contract; and
 - (ii) required for EnergyAustralia to carry out its obligations or exercise its rights under this Contract.

16A ResponsePro

If the Customer has opted in to ResponsePro as indicated in the Schedule then the terms and conditions in Appendix B apply to the Customer.

17. Consumption and Demand Levels

17.1 Application

This clause 17 will apply only if the Customer:

- (a) has, at the Commencement Date, a Forecast Load of more than 5GWh in any contract year; or

- (b) at any stage after the Commencement Date, in EnergyAustralia's reasonable opinion, the Customer's aggregate consumption of electricity at the Connection Points in any Contract Year will be more than 5GWh.

17.2 Forecast Load

- (a) EnergyAustralia has calculated the Energy Charges on the basis of the Forecast Load for each Jurisdiction.
- (b) Unless expressly agreed by the parties, the Forecast Load does not vary as a result of the addition or removal of Connection Points under clause 12.
- (c) The Customer must notify EnergyAustralia as soon as possible after it becomes aware that its aggregate electricity consumption at the Connection Points in a Jurisdiction may, in any Contract Year, be less than the relevant Minimum Load or be greater than the relevant Maximum Load.

17.3 Minimum Consumption

- (a) If the Customer's aggregate electricity consumption at the Connection Points in a Jurisdiction in any Contract Year is less than the relevant Minimum Load, then in addition to paying the Charges for that electricity consumption, the Customer must also pay EnergyAustralia any Shortfall Charges EnergyAustralia may impose.
- (b) EnergyAustralia will use reasonable endeavours to reduce any relevant Minimum Load to accommodate a reduction in the Customer's electricity consumption caused by a Force Majeure Event.
- (c) If the Shortfall Charges are a negative amount, the Shortfall Charges will be deemed to be zero.
- (d) Subject to clause 17.3(a), the Shortfall Charges shall be calculated as specified under clause 20.

17.4 Maximum Consumption

If the Customer's aggregate electricity consumption at the Connection Points in a Jurisdiction in any Contract Year is greater than the relevant Maximum Load, then in addition to paying the Charges for that electricity consumption, the Customer must also pay EnergyAustralia any Excess Charges EnergyAustralia may impose. The Excess Charges shall be calculated in accordance with the formula provided under clause 20. If the Excess Charges are a negative amount, the Excess Charges will be deemed to be zero.

17.5 Payments

EnergyAustralia will use reasonable endeavours to calculate the amount (if any) owed by the Customer under this clause 17 at the end of each Contract Year and at the termination of this Contract and include such amount on the Customer's next or final invoice.

18. Other Matters

18.1 Connection Arrangements

The Customer must obtain the prior approval of EnergyAustralia to:

- (a) on-sell any electricity supplied to a Connection Point;
- (b) make a further connection between a Premises and a Network; or
- (c) generate electricity at a Connection Point so that the Customer's electricity consumption profile at that Connection Point is materially changed.

18.2 Notices

- (a) Notices under this Contract must be in writing and given by hand or sent by facsimile, email or by mail to the facsimile numbers, email addresses or addresses of EnergyAustralia and the Customer specified in the Schedule or in any other manner agreed by the parties.

- (b) A notice sent in accordance with this clause will be deemed received by the recipient:

- (i) in the case of delivery by hand, on the date of delivery;
- (ii) in the case of a notice sent by facsimile, on the date indicated on the relevant facsimile confirmation receipt;
- (iii) in the case of email, the date when the sender receives an automated message confirming delivery or four hours after the time sent (as recorded on the device from which the sender sent the email) unless the sender receives an automated message that the email has not been delivered; and
- (iv) in the case of a notice sent by letter, on the date 3 Business Days after the date of posting.

- (c) Any change in the address or any notice details of a party specified in the Schedule must be advised in writing to the other party (and the Schedule will be deemed amended accordingly).

18.3 Transfer of Rights and Obligations

- (a) The Customer shall only transfer its rights and obligations under this Contract with EnergyAustralia's prior written consent. EnergyAustralia may require that reasonable conditions be met before providing its consent.
- (b) The Customer hereby grants its unconditional consent to the transfer by EnergyAustralia of any or all of its rights or obligations under this Contract to a party holding all authorisations required to become Financially Responsible for the relevant Connection Points.

18.4 Relevant Law

- (a) The laws of Victoria govern this Contract and each party submits to the jurisdiction of the courts of Victoria.
- (b) The parties acknowledge that the laws of a Jurisdiction may impose certain requirements on the form or content of contracts with electricity consumers within the Jurisdiction. To the extent that this Contract is inconsistent with such laws, the terms of this Contract will be deemed amended for any Connection Points to which those laws apply, to the extent necessary to comply with those laws.
- (c) If the laws of Jurisdiction impose additional Charges or implement any change to the Charges specified in the Schedule, EnergyAustralia will notify the Customer of such changes in Jurisdiction and invoices will be adjusted accordingly.

18.5 Interpretation and General

- (a) In this Contract a reference to:
 - (i) any law will be read as a reference to that law as amended, consolidated, supplemented or replaced and any regulation, rule, ordinance, proclamation, by-law or judgment made under that law;
 - (ii) a document includes any variation or replacement of it;
 - (iii) a person, includes an individual, firm, body corporate, an unincorporated association or an authority; and
 - (iv) the words "include", "includes" and "including" means "including without limitation".
- (b) If a provision of this Contract is invalid or unenforceable in a Jurisdiction:
 - (i) it is to be read down or severed in that Jurisdiction to the extent of the invalidity or unenforceability; and

- (ii) it does not affect the validity or enforceability of that provision in any other Jurisdiction or of the remaining provisions.
- (c) A waiver by a party of a provision or a right under this Contract is binding on that party only if it is given in writing. A failure by a party to exercise a right, or a delay in exercising a right, does not operate as a waiver of that right or otherwise prevent the party exercising that right.
- (d) This Contract may be executed in counterparts. All counterparts together will be taken to constitute one instrument.
- (e) This Contract, together with the Schedule and any documents referred to in this Contract, is the entire agreement of the parties about the subject matter of this Contract and supersedes any prior representations, negotiations, arrangements, understandings or agreements and all other communications.
- (f) The Schedule will prevail over these terms and conditions to the extent of any inconsistency.
- (g) Any words used in this Contract and not otherwise defined in clause 20 will bear the meaning (if any) set out in the Rules.

19. Web Portal Access

- (a) The Customer has access to the EnergyAustralia's online energy management portal (the Web Portal), which provides access to the Customer's electricity invoices, Meter data and site statements, via a username and password.
- (b) The Customer acknowledges that EnergyAustralia owns the data used to create the invoices, Meter data and site statements. The Customer must only use and reproduce the invoices, Meter data and site statements accessed via the Web Portal in accordance with this Contract.
- (c) The invoices, Meter data and site statements accessed by the Customer via the Web Portal contain Confidential Information. The Customer must keep its Web Portal username and password safe and not allow it to be shared with or used by a third party unless that third party is acting as an agent of, a broker or service provider to the Customer. Only the Customer may change its Web Portal password.
- (d) The Customer must notify EnergyAustralia in writing:
 - (i) when a third party acting as an agent, a broker or service provider to the Customer is required to have access to the Web Portal at any time during the term of this Contract; and
 - (ii) when Web Portal access to a third party acting as an agent, a broker or service provider to the Customer shall be ceased at any time during the term of this Contract.
- (e) The Customer indemnifies EnergyAustralia and its contractors and service providers against any loss or damages which they might suffer, or be liable for, as a result of any unauthorised use of the Customer's Web Portal username and password, howsoever caused.
- (f) EnergyAustralia does not warrant that the Customer's access to the Web Portal will be continuous and fault free. The Customer must notify EnergyAustralia of any loss of, or fault in, access to the Web Portal.
- (g) EnergyAustralia has no liability to the Customer arising out of the Customer's use of, or reliance on, any information accessed by it via the Web Portal.

- (h) EnergyAustralia may terminate the Customer's access to the Web Portal if the Customer does not comply with any provisions under this clause 19.
- (i) In this clause, Customer includes employees, contractors of the Customer, and any third party authorised by the Customer.

20. Definitions

Any word capitalised will have the meaning set out below:

Actual Load Shape – the proportion of electricity that the Customer actually consumed at Peak Time Periods and Off Peak Time Periods over a Contract Year.

Additional Load Costs – EnergyAustralia's costs of supplying electricity to meet the Customer's Actual Load Shape:

- (a) taking into account EnergyAustralia's reasonable wholesale costs (in the wholesale electricity derivative contracts market and the NEM spot market) of purchasing sufficient wholesale electricity to supply that Actual Load Shape; and
- (b) allowing EnergyAustralia to achieve a reasonable retail margin on those wholesale costs.

Without limiting the foregoing, a margin on its wholesale costs similar to that forecast by EnergyAustralia for this Contract, as at the date of signing this Contract, will be taken to be a reasonable margin.

AER – means the *Australian Energy Regulator*.

Aggregated Customer – means a customer whose aggregate energy usage across all Premises (except those in Victoria) exceed the Small Customer Thresholds.

Approved Rating – a rating of BBB or greater by Standard and Poor's or an equivalent rating by a rating agency of similar status.

Business Day – a day other than Saturdays, Sundays and public holidays in the major city where the Connection Point or Connection Points are located.

Carbon Scheme – any statutory fixed or cap and trade emissions trading scheme (or, to the extent that a carbon tax constitutes a Carbon Scheme, the carbon tax) for the management of greenhouse gas emissions or concentrations.

Carbon Scheme Charge – any charges incurred or charged by EnergyAustralia in complying with a Carbon Scheme, and provide for the full recovery of EnergyAustralia's costs in connection with its obligations under a Carbon Scheme.

Change in Law –

- (a) any law, regulation, rule, code or sub-code (including the *National Electricity Law* and the Rules) being introduced, amended or repealed in whole or in part after the Commencement Date;
- (b) any new or increased tax, fee or charge (including any carbon tax) imposed on EnergyAustralia after the Commencement Date in relation to the purchase of electricity by EnergyAustralia for sale to the Customer or the purchase by the Customer of electricity and/or any other goods or services from EnergyAustralia;
- (c) any new or increased tax, fee or charge (including any carbon tax), fee or charge imposed on any other person after the Commencement Date and having the effect of increasing the cost of electricity and/or any other goods or services purchased by EnergyAustralia for sale to the Customer, or the amounts payable by EnergyAustralia under any hedge contract;
- (d) the imposition of any tax or change in the rate or way any tax is calculated which results EnergyAustralia being required to pay an amount that it would not otherwise be required to pay, or

a change in the amount that EnergyAustralia is required to pay under the law that applied at the date of this Contract;

- (e) any law, or mandatory or voluntary scheme being introduced, amended or repealed in whole or in part after the Commencement Date which relates to the emission of carbon, carbon compounds, greenhouse gases or greenhouse precursor gases into the atmosphere or is for the purpose of encouraging the generation of electricity from 'renewable' or 'green' energy sources or deterring the generation of electricity from 'non-renewable' or 'non-green' energy sources; or
- (f) any law, regulation, rule, code or sub-code (including the National Electricity Law and the Rules), or mandatory or voluntary scheme being introduced, amended or repealed in whole or in part after the Commencement Date which relates to the security or reliability of the National Grid or any part of it, including without limitation, the imposition of an energy guarantee or similar scheme requiring EnergyAustralia or its related bodies corporate to:
 - (i) comply with a reliability guarantee, including an obligation to meet a certain proportion of its load requirements with flexible and dispatchable energy generation, storage, demand reduction, demand management or other energy related services or resources; and/or
 - (ii) comply with an emissions guarantee, including an obligation to meet its load requirements with energy (or energy related services) purchases or contracts achieving a specified or determined average emissions level.

Charges – all Connection Services Charges, Early Termination Charges, Energy Charges, Environmental Charges, Market Charges, Metering Charges, Network Charges, the Supply Charge, Carbon Scheme Charge, and other amounts set out in the Schedule or payable by the Customer under this Contract.

Commencement Date – the date EnergyAustralia receives an executed Schedule from the Customer.

Company Tax Rate – means the rate of tax payable by companies as specified in the *Income Tax Rates Act 1986 (Cth)* (as amended or replaced from time to time).

Confidential Information – the Energy Charges, Environmental Charges, information about the terms or effect of this Contract and any other information exchanged between the parties that is expressly identified as confidential, but does not include any information within the public domain (other than as a result of a breach of clause 16).

Connection Contract – a connection contract or supply and connection contract between the Customer and a Network Operator in relation to the connection of any Premises to a Network and/or the delivery, supply or conveyance of electricity across the Network.

Connection Point – the point at which a Premises is connected to a Network.

Connection Services – connection of any Premises to a Network, any increase in the capacity of a connection, maintenance of capacity and other related services.

Connection Services Charges – any charges incurred or charged by EnergyAustralia in arranging Connection Services.

Contract – the terms and conditions of this retail electricity contract together with the Schedule.

Contract Year – a continuous period of 12 months commencing on the Start Date or the anniversary of the Start Date (as applicable). If the period between the start

of a Contract Year and the termination or expiry of this Contract is less than 12 months, that period will be deemed a Contract Year and any Forecast Load for that Contract Year pro-rated accordingly.

Customer – the person whose details are set out in the Schedule as a party to this Contract.

Default Rate – in the case of:

- (a) Energy Charges for a Connection Point, is a rate or rates set by EnergyAustralia, published on EnergyAustralia's website www.energyaustralia.com.au and amended from time to time, being the rate EnergyAustralia reasonably determines is necessary to recover its costs of acquiring electricity in the NEM, plus a reasonable margin; and
- (b) Environmental Charges for a connection point, is a rate or rates set by EnergyAustralia (and amended) from time to time, being the rate EnergyAustralia reasonably determines is necessary to recover its Environmental Costs associated with the electricity supplied to the Connection Point, plus EnergyAustralia's reasonable administrative costs.

Early Termination Charges – EnergyAustralia's reasonable Charges incurred as a direct result of the termination of this Contract prior to the Expiry Date. These Early Termination Charges are calculated using Peak, Shoulder and Off-Peak Energy Charges specified in the Schedule, for the aggregated electricity consumption under the Contract for the relevant Contract Year.

Early Termination Charges may include outstanding Metering Charges and reasonable administration fee as determined by EnergyAustralia (if any) associated with termination of this Contract prior to the Expiry date.

Economic Loss – loss other than damage to physical property of the Customer, and includes corruption of data losses, business interruption losses and loss of profits.

EnergyAustralia – EnergyAustralia Pty Ltd (ABN 99 086 014 968) of Level 19, 697 Collins Street, Docklands, Victoria, 3008.

Energy Charges – charges for the consumption of electricity by the Customer at a Connection Point as set out in the Schedule, multiplied by any applicable Loss Factor.

Environmental Charges – charges that provide for the full recovery of EnergyAustralia's Environmental Costs (which may include EnergyAustralia's reasonable forecast of any component of those Environmental Costs).

Environmental Costs – any costs or charges incurred, or likely to be incurred, by EnergyAustralia:

- (a) in complying with its Environmental Obligations, including the costs of creating or acquiring Environmental Credits;
- (b) in failing to surrender the required number of Environmental Credits for any period for any reason, including the Tax Adjusted Legislative Charge; or
- (c) in mitigating or reducing EnergyAustralia's Environmental Obligations or the costs associated with EnergyAustralia's Environmental Obligations.

Environmental Credits – any permits, permissions, allowances or instruments recognised under international, national or state legislation and able to be surrendered by EnergyAustralia to meet its Environmental Obligations.

Environmental Obligations – any obligations imposed on or commitments made by EnergyAustralia for the direct or indirect purposes of:

- (a) reducing levels of greenhouse gas emissions or any other environmental benefit;
- (b) increasing the uptake of renewable electricity;
- (c) reducing electricity consumption; or

(d) encouraging efficiency of electricity usage by consumers.

Excess Charges – the amount calculated for each Jurisdiction in accordance with the following formula:

$$EC = (AC - AEL_{MAX}) \times (PP - CP) \times LF$$

where:

EC	Excess Charges
AC	actual aggregate electricity consumption under the Contract for the relevant Contract Year (in MWh)
AEL _{MAX}	Maximum Load (in MWh) for the relevant Contract Year
PP	the volume weighted average regional reference price of electricity for the Jurisdiction in which the Connection Point is located for the relevant Contract Year
CP	the volume weighted average Energy Charge per MW of electricity for the relevant Contract Year; and
LF	the volume weighted average Loss Factor for the Jurisdiction in which the Connection Point is located for the relevant Contract Year.

Expiry Date – the date specified as such in the Schedule.

Financially Responsible – where an electricity retailer is recognised by the Market Operator as the party responsible for the wholesale purchase of electricity consumed at a Connection Point.

Force Majeure Event – means an event beyond the reasonable control of the affected party and not reasonably capable of being prevented by the affected party.

Forecast Load – the forecast load (if any) for the Connection Points in a Jurisdiction set out in the Schedule for each Contract Year.

Forecast Load Shape – the proportion of electricity that the Customer has forecasted that it will consume at Peak Time Periods and Off Peak Time Periods over a Contract Year, as shown in Part 1 of the Schedule.

GST – has the meaning set out in the *GST Act*.

GST Act – the *A New Tax System (Goods and Services Tax) Act 1999 (Cth)*.

Jurisdiction – in relation to a Connection Point, the State or Territory of Australia in which that Connection Point is situated.

Last Resort Event – an event affecting EnergyAustralia that triggers the operation of the relevant Jurisdiction's retailer of last resort arrangements with respect to EnergyAustralia's sale of electricity to the Customer at a Connection Point.

Liability – a liability under contract, tort (including negligence) or any other basis, including where caused by that party's negligent or wilful act or omission.

Loss Factor – the combined transmission and/or distribution loss factors applicable to a Connection Point.

Market Charges – any NEM participant fees, ancillary services fees or other NEM charges or levies incurred by EnergyAustralia in selling electricity at a Connection Point.

Market Operation Rules – any rules or other requirements in a Jurisdiction relating to the sale of electricity, including where relevant, the terms of any use of system, coordination or other agreement entered into by EnergyAustralia with a Network Operator.

Market Operator – the party responsible for the operation of the NEM in accordance with the Rules.

Market Retail Contract – EnergyAustralia's "Market retail contract terms and conditions" published on EnergyAustralia's website www.energyaustralia.com.au as amended from time to time.

Market Participant – has the meaning given in the Rules.

Maximum Load – the amount determined by multiplying the Forecast Load for a Jurisdiction by the Maximum Percentage.

Maximum Percentage – the percentage set out in the Schedule.

Meter – a device complying with the Metering Rules for measuring and recording consumption of electricity and any current transformer as defined in the Rules, voltage transformer as defined in the Rules, kVA demand meter, communications device or other associated equipment.

Meter Installation Timeframes – are as set out in clauses 7.8.10A(a)(1)(i), 7.8.10A(a)(1)(ii), 7.8.10B(a)(1)(i), 7.8.10B(a)(1)(ii), 7.8.10C(a)(1)(i) and 7.8.10C(a)(1)(ii) of the *National Electricity Rules*.

Metering Charges – the Meter provision, Meter reading, Metering Data Provider and other Meter-related charges incurred or charged by EnergyAustralia in arranging Metering Services for a connection Point, including any special meter reads.

Metering Coordinator – a metering coordinator accredited pursuant to the Rules.

Metering Data Provider – a metering data provider accredited pursuant to the Rules.

Metering Provider – the provider of Metering Services to that Connection Point under the Rules.

Metering Rules – any applicable legislation, regulation or other applicable requirement as to the Meter and Metering Services required at a Connection Point.

Metering Services – the Meters and other related services provided in respect of a Connection Point, including installing, maintaining, calibrating, testing and reading of Meters, calculation of the electricity consumption at a Connection Point for type 7 metering installations, verifying and forwarding data and any Metering Provider or Metering Data Provider requirements.

Minimum Load – the amount determined by multiplying the Forecast Load for a Jurisdiction by the Minimum Percentage.

Minimum Percentage – the percentage set out in the Schedule.

NEM – the National Electricity Market.

Network – an electricity distribution network.

Network Charges – electricity transmission and distribution network charges and any other charges imposed by a Network Operator for Network Services.

Network Operator – the person owning or controlling the Network to which a Premises is connected at a Connection Point.

Network Services – the operation, maintenance and control of a Network and the supply, delivery or conveyance of electricity across a Network (and includes any such services in relation to a transmission network).

Off Peak Time Periods – the time periods described as "Off Peak" in the table in section A of Part 2 of the Schedule.

Peak Time Periods – the time periods described as "Peak/Shoulder" in the table in section A of Part 2 of the Schedule.

Premises – a site specified in the Schedule.

Privacy Policy – EnergyAustralia's privacy policy.

Qualifying Contracts – has the meaning given in the Initial Laws, as implemented in the RRO Laws that apply in the locations of the Premises (as applicable).

REE Act – the *Renewable Energy (Electricity) Act 2000 (Cth)* and related legislation and regulations each as amended from time to time.

REE Costs – EnergyAustralia's Environmental Costs in connection with its obligations under the REE Act and the VEET Act.

Regulatory Authority – means:

- (a) any government or a governmental, quasi-governmental or judicial entity or authority;
- (b) a stock exchange; and
- (c) any other authority, agency, commission, regulator, ministry, department, instrument, tribunal (including any pricing body), enterprise or similar entity,

of Australia that has powers or jurisdiction under any laws, including RRO Laws, over a party or any act relating to this Contract.

Reliability Instrument – has the meaning given in the Initial Laws, as implemented in the RRO Laws that apply in the locations of the Premises (as applicable).

Retailer of Last Resort – the entity appointed under the relevant Jurisdiction's retailer of last resort arrangements to supply electricity to the Customer at a Connection Point following the occurrence of a Last Resort Event.

RRO – means the Retailer Reliability Obligation described in the RRO Laws.

RRO Laws – means the *National Electricity (South Australia) (Retailer Reliability Obligation) Amendment Act 2019 (SA)*, including any regulations made thereunder, and the *National Electricity Amendment (Retailer Reliability Obligation) Rule 2019* as proposed by the Energy Security Board or the Council of Australian Governments Energy Council from time to time (together, the **Initial Laws**) and any other pieces of legislation, regulations, other statutory instruments (including the Rules) or proclamation or any binding requirements or direction of a Regulatory Authority which are necessary or incidental to implementing the Initial Laws or the RRO in any jurisdiction in Australia.

Rules – the National Electricity Rules under the *National Electricity Law*.

Run Off Period – the period referred to in clause 11.2(a) of this Contract.

Schedule – the document entitled Schedule – Business Sales Retail Electricity Contract.

Shortfall Charges – the amount calculated for each Jurisdiction in accordance with the following formula:

$$SC = (AC - AEL_{MIN}) \times (PP - CP) \times LF$$

where:

SC	Shortfall Charges
AC	actual aggregate electricity consumption under the Contract for the relevant Contract Year (in MWh)
AEL_{MIN}	Minimum Load (in MWh) for the relevant Contract Year
PP	the volume weighted average regional reference price of electricity for the Jurisdiction which the Connection Point is located for the relevant Contract Year
CP	the volume weighted average Energy Charge per MWh of electricity for the relevant Contract Year
LF	the volume weighted average Loss Factor for the Jurisdiction in which the Connection Point is located for the relevant Contract Year.

Small Customer – means:

- (a) in New South Wales, South Australia, Queensland and the Australian Capital Territory, a small customer for the purposes of the *National Energy Retail Law*; and
- (b) in Victoria, a relevant customer for the purposes of section 36 of the *Electricity Industry Act 2000 (Vic)*.

Small Customer Thresholds – means the upper consumption thresholds for Small Customers prescribed by law in each state or territory from time to time and which are currently:

- (a) in New South Wales, Queensland and the Australian Capital Territory, 100MWh of electricity per year;
- (b) in South Australia, 160MWh of electricity per year; or
- (c) in Victoria, 40MWh of electricity per year.

Small Electricity Customer – a person who consumes electricity at a rate less than that prescribed by the laws of the Jurisdiction for the contestable sale of electricity or for whom the laws of the Jurisdiction require certain terms and conditions in any contract for the purchase of electricity.

Start Date – the date set out in the Schedule.

Supply Charge – the supply charge (if any) set out in the Schedule.

Tax Adjusted Legislative Charge – means the large-scale generation shortfall charge as defined in the *Renewable Energy (Electricity) Large-scale Generation Shortfall Charge Act 2000 (Cth)* and levied under the REE Act divided by (1- Company Tax Rate applicable at the date any large-scale generation shortfall charge is levied).

Tax Invoice – has the meaning set out in the GST Act.

Taxable Supply – has the meaning set out in the GST Act.

Term – means the period between the Start Date and the Expiry Date.

Transfer Requirements – any requirement for the transfer of financial responsibility between electricity retailers, including any Market Operation Rules, NEM Metering and Administration System and Retail Transfer Procedures and Metering Rules.

VEET Act – the *Victorian Energy Efficiency Target Act 2007 (Vic)* and related legislation and regulations each as amended from time to time.

APPENDIX A

PRIVACY STATEMENT

EnergyAustralia Pty Ltd collects personal information (**Information**) to assist in facilitating the sale and supply of electricity under this Contract. EnergyAustralia may disclose the Information to its related bodies corporate, contractors and suppliers (such as information technology providers) for the purposes set out in its Privacy Policy and this Privacy Statement.

If the Customer does not provide the Information requested, EnergyAustralia may not be able to finalise this Contract.

Some of EnergyAustralia's contractors and suppliers to whom the Information may be disclosed are located overseas, including in India and New Zealand.

If the Customer has any concerns or queries about the way any personal information provided is managed by EnergyAustralia, the Customer shall contact EnergyAustralia at:

The Privacy Officer

EnergyAustralia

Locked Bag 14060

Melbourne City Mail Centre 8001

EnergyAustralia's Privacy Policy is available at www.energyaustralia.com.au. EnergyAustralia's Privacy Policy contains information about how the Customer can gain access to or seek correction of personal information that held about the Customer. It also contains information about how a privacy complaint may be made and how EnergyAustralia will deal with it.

APPENDIX B

ResponsePro

- 1.1 This Appendix B sets out the terms and conditions for the ResponsePro product (**ResponsePro**) and forms part of the Contract. ResponsePro provides an opportunity for C&I customers to receive payment for changing their net electricity usage from the grid during a period nominated by EnergyAustralia.
- 1.2 Where applicable, the terms of the Contract apply to this Appendix B and if there is any inconsistency between this Appendix B and the Contract the terms of this Appendix B will prevail to the extent of the inconsistency.
- 1.3 Capitalised terms (where they are not defined in the Contract) are defined within this Appendix B.

2. PowerDown Event

- 2.1 EnergyAustralia can call a PowerDown Event at any time for a duration of 1 to 4 hours, but typically when there is a supply and demand imbalance in the market such as during hot weather.
- 2.2 To call a PowerDown Event EnergyAustralia will provide a request to the Customer via SMS (or another communication method notified to you) that will provide the day, start time and end time of the PowerDown Event. EnergyAustralia may also provide other notifications about the event.
- 2.3 The Customer receives the request and at their discretion, reduces their net electricity usage from the grid during the PowerDown Event by either decreasing their energy consumption or by increasing behind-the-meter generation (e.g. turning up on-site generation or dispatching energy storage like on-site batteries) during the PowerDown Event.
- 2.4 There are no penalties for non-participation in a PowerDown Event. The Customer may opt-out of any PowerDown Event communication via the opt-out facility and remain eligible for payment.
- 2.5 EnergyAustralia may run multiple PowerDown Events on the same day by providing the Customer multiple PowerDown requests. EnergyAustralia can cancel or change the time of a PowerDown Event by providing a notification prior to its start time.

3. Payments

- 3.1 For each Trading Interval during a PowerDown Event, EnergyAustralia will pay the customer a payment calculated as follows:

Payment = PowerDown Payment Rate x Volume Reduction x Loss Factor

where:

PowerDown Payment Rate = the rate specified in the Schedule

Volume Reduction (in kWh) = Baseline – Actual Consumption

Baseline = An estimate of the amount of electricity (in kWh) that the Customer would have consumed through the Connection Point during the Trading Interval if the PowerDown Event had not occurred. The CAISO 10 methodology is used to calculate the baseline which was developed by the California Independent System Operator (CAISO) and is widely used across the industry. A detailed description is available on the EnergyAustralia website under the Business FAQs for ResponsePro section.

Actual Consumption = Customer electricity load in kWh as measured at the Connection Point for the respective Trading Interval.

Loss Factor = Applicable loss factors to convert from the Connection Point to the Regional Reference Node.

- 3.2 The total payment for the PowerDown Event will be the sum of the payments for each Trading Interval across the duration of the PowerDown Event and if it is negative (meaning the Customer did not reduce the amount of energy used at the connection point across the PowerDown Event) it will be given as zero so the Customer will not receive a payment or be penalised.
- 3.3 In the event of multiple requests in a 24 hour period EnergyAustralia reserves the right to adjust the baseline as needed to accurately reflect the Customer's usage variations during the relevant Trading Intervals.
- 3.4 Payments will be calculated after the PowerDown Event, will be applied as a credit on the Customer's electricity account and will be deducted from the Customer's next electricity invoice after the credit has been applied.

4. EnergyAustralia's Liability

- 4.1 To the extent permitted by law, EnergyAustralia is not liable to the Customer for any loss, harm, damage, cost or expense, including any indirect or consequential loss, arising directly or indirectly under or in connection with this Appendix B or the performance or non-performance under this Appendix B and whether arising under any indemnity, statute, in tort (for negligence or otherwise) or on any other basis in law or equity.

5. Customer Acknowledgements

- 5.1 The Customer must ensure that it considers personal safety before responding to a request and should not participate in a PowerDown Event where an energy reduction will result in discomfort or injury sustained by itself or those in its care.
- 5.2 The Customer must not enter into any other demand response agreements unless EnergyAustralia has provided prior written consent.
- 5.3 The Customer consents to receiving SMS notifications associated with this product from EnergyAustralia which do not include an unsubscribe facility.

6. Data

- 6.1 You acknowledge that in order for us to provide ResponsePro we and our third party service providers will share your nominated contact details (including name, email address, phone number) and may also use and share the data on your electricity usage collected by your electricity meter. You consent to your registered metering coordinator providing your electricity metering data to us and our third party service providers to use that electricity metering data for the purpose of identifying your electricity usage and providing you with the ResponsePro product.

7. GST

- 7.1 The Demand Response Payments or any other consideration under this Appendix B includes any GST payable on that supply.

8. Variation and Termination of this Appendix B

- 8.1 Subject to this clause, this Appendix B may not be varied except in writing signed by both parties.
- 8.2 EnergyAustralia reserves the right to modify the Baseline calculation methodology at any time and will notify the Customer in writing before any such change takes effect.
- 8.3 EnergyAustralia may vary any terms in this Appendix B if there is a Change in Law that impacts the provision, pricing or settlement of wholesale, retail or behind-the-meter services. However, the variation must only reflect the change in costs resulting from the Change in Law.
- 8.4 Either party may terminate this Appendix B by giving written notice to the other party. The

Appendix B will end on the last day of the financial Quarter in which the notice is received.

- 8.5 Unless otherwise agreed, termination of this Appendix B does not terminate the Customer's Contract nor any other agreement between EnergyAustralia and the Customer.
- 8.6 This Appendix B will run for the same term as the Customer's Contract unless terminated earlier and if the Customer's Contract ends, this Appendix B also terminates with effect from the same date.

9. Definitions

In this Appendix B:

Regional Reference Node and **Trading Interval** have the meanings given in the National Electricity Rules.
